PERKINS WINDMILL

Is new in this country, but in the United States THOUSANDS are in use, and on account of their superior strength and easy running qualities, they have taken FIRST RANK among windmills.

We have just received a carload of Mills and can furnish on short notice STEEL GALVANIZED MILLS of 8, 10 and 12-foot diameter, and WOOD MILLS of 8, 10, 12, 14, 16, and 18-foot diameter.

We have direct motion windmills for places where there are steady strong winds, and geared mills which will run in very light winds, but cannot pump so fast as the direct motion mills. Some of our mills have oiled bearings of the most approved kinds, and some the celebrated graphite bearings, which will run for years without any oil, also steel galvanized towers, 30 and 40 feet high.

Send for the PERKINS CATALOGUE and read the description of the geared mills for farmers and stockmen. With the use of shafting and pulleys they can be made to grind corn or barley, cut fodder, turn a grindstone and saw your wood.

Wooden Towers can be erected if preferred, and we give directions for the timber and erection. We have also Gould's Lifting and Force.

PUMPS for house or windmill use. We can furnish redwood tanks, also, of all sizes from 800 gallons to 10,000 gallons made in the best way and of the best clear redwood.

The perfect satisfaction that the Perkins Windmills and the Gould's Pumps have given wherever they have been used and properly adjusted is a guarantee of their success. Try the Perkins Mill and get something that will stand the strongest wind and yet work well in the lightest southerly wind.
